

Leveraging the diverse values of nature for transformative change (Session 6)

Thursday 15. May (Day 3) at 10:00, Room 2

Session format: workshop (presentations and interactive small-group discussions)

Chair: Clara Veerkamp (PBL), Alexandra Marques (PBL), Eszter Keleman (ESSRG), Ana Lillebø (CESAM)

The session structure features four themes:

Theme 1: Integrating diverse values of nature into Policy and Governance

- Speaker: **Machteld Schoolenberg** (senior policy researcher at Netherlands Environmental Assessment Agency (PBL), Netherlands) on 'Integrating Plural Values and Justice in Scenarios for a Nature-Positive Future'
- Posters:
 - Multispecies Justice in Urban Greening and Urban Nature Governance (Anastasia Van Der Meer)
 - Leviticus 24:18 Whoever kills an animal must make restitution (Jomme Desair)

Theme 2: Embedding Natural Capital in Economic Systems

- Speaker: Dr **Daniel Norton** (environmental and marine economist at the University of Galway, Ireland (NUIG)) on 'Challenges of valuing natural capital in economic systems for sustainable decision-making'
- Posters:
 - Effects of Biodiversity on the Provision of Ecological and Economic Ecosystem Services - Insights from a 20-Year Biodiversity Experiment (Marius Munschek)
 - Problematising 'natural capital': The boom (and bust?) of a metaphor (Alys Daniels-Creasey)
 - Blue economy concepts and their association to ocean literacy: Insights from a global systematic review (Mariana Almeida)

Theme 3: Mobilizing relational values of Nature for restoration and conservation

- Speaker: Dr **Eszter Kelemen** (co-founder and senior researcher at the Environmental Social Science Research Group (ESSRG), Hungary) on 'Mobilizing relational values of nature for conservation and restoration'
- Posters:
 - Shaping biodiversity: How experts' perceptions of values, rules, and knowledges influence biodiversity measuring in offsetting (Heidi Lehtiniemi)

- Revealing personal and professional connections with nature together with a boundary organisation (Imani Shalimar Taroenodikromo)

Theme 4: Empowering Indigenous and Local Knowledge

- Speaker: Prof **Vera Helene Hausner** (Professor of Sustainability Science, Arctic University of Norway) on Enabling desirable transformative changes through mutual learning with diverse knowledge holders
- Posters:
 - Broadening the arguments for transformative change in conservation: Values associated with nature's contributions to people (Milena Gross)
